

ROMCO RPM

On Site. On Time.

The "RPM" stands for Rapid Program Maintenance, one of the best ways to promote the longest possible life and least amount of downtime for your heavy equipment.

ROMCO RPM uses a 24-point inspection specially designed for use with larger diesel engines. Using quality products at regularly scheduled intervals protects your investment and can add years the lives of the machines in your fleet.

ROMCO RPM

- Performs factory recommended maintenance on any make or model
- Works on your schedule at your location to minimize downtime
- Uses only top-of-the-line products
- Tests the oil at every service for an accurate machine history
- Properly disposes oil and filters
- Frees up your on-staff mechanics and technicians for other projects

Call us today!

Schedule one service for a single machine or long-term programs for an entire fleet.

ROMCO's specially trained lube service technicians are ready to perform the service interval you need.
